noorth

Research and innovation, the basics of a life project.

Trovare soluzioni per l’arredo bagno è un’attività che impegna la nostra famiglia dal 1976. Un percorso imprenditoriale rivolto ad un mercato sempre più internazionale che ha interpretato il forte cambiamento degli stili di vita e delle abitudini individuali degli ultimi decenni. Con il progetto Noorth, presentato nel 2016 al Salone del Bagno di Milano, ci siamo posti l’obiettivo di esprimere una visione moderna, fondata sulla ricerca e l’innovazione e ispirata ai valori di originalità e coerenza. Ponendoci come obiettivo la qualità in ogni fase del processo, dal design alla produzione, dalla comunicazione ai servizi pre e post vendita, ci impegniamo costantemente per superare gli standard abituali. Dialoghiamo con professionisti diversi per linguaggio e sensibilità per offrire, nel rispetto di un’armonia complessiva, una proposta completa e differenziata. Perché il bagno è un ambiente particolare, con esigenze tecniche specifiche e allo stesso tempo desideri legati alla sensibilità individuale: importante quindi suggerire interpretazioni differenti, modulate su un pensiero comune e coerente. Obiettivo che rende l’ambiente bagno una dimensione ideale per il design e che per noi si traduce nella ricerca costante di un equilibrio tra tecnologia e artigianato, memoria e innovazione, logiche industriali e personalizzazione. La collezione prevede sistemi componibili integrati a una gamma di lavabi e accessori tra le più complete del settore, proposte basate sul rigore e la massima essenzialità formale, affiancate da pezzi iconici, caratterizzati da una forte espressività. Noorth è oggi una realtà definita, il risultato concreto di una precisa visione, un progetto sempre nuovo che ci stimola e ci entusiasma.

Since 1976, our family has been finding solutions for bathroom furniture. An entrepreneurial path aimed at an increasingly international market that has interpreted the radical changes in lifestyles and personal habits of the last decades. With the Noorth project, presented in 2016 at the Salone del Bagno in Milan, we set ourselves the goal of expressing a modern vision based on research and innovation and inspired by the values of originality and consistency. Being aware that quality is a goal to be reached in each single stage of the process, from design to production, from communication to pre- and post-sales services, we constantly work on all fronts to go above and beyond the usual standards. We talk to professionals of different languages and sensitivity to offer a complete and differentiated, but overall harmonious, proposal. As the bathroom is a particular environment, with specific technical needs and at the same time desires linked to individual sensitivity, it is important to suggest different interpretations, built around a common and coherent idea. A goal which makes the bathroom an ideal dimension for design and which, for us, translates into the constant search for balance between technology and craftsmanship, memory and innovation, industrial logics and customisation. The collection includes modular systems supplemented by one of the most complete range of washbasins and accessories in the industry, proposals based on precision and maximum simplicity supported by iconic pieces that stand out by being remarkably expressive. Today, Noorth is a definite reality, the concrete result of a precise vision, a new project that stimulates us and fills us with enthusiasm.

THE STORY OF THE NOORTH COLLECTION THROUGH COSTUMIZED SOLUTIONS, EVOCATIVE SCENARIOS AND TECHNICAL INSIGHTS.
A VOLUME DEDICATED TO THE CONTEMPORARY BATHROOM, LINKED TO THE THEME OF EMOTIONS AND WELL-BEING, IN WHICH THE NOORTH LINE APPEARS IN ITS ENTIRETY.

Un approccio sartoriale al progetto bagno per una collezione senza tempo, un viaggio attraverso soluzioni versatili e improntate alla massima funzionalità. Una collezione caratterizzata dall’esclusività dei materiali, dall’equilibrio dei volumi e da approfondite ricerche cromatiche; una proposta esclusiva, dai dettagli sofisticati, in cui la qualità delle lavorazioni, la ricca offerta di soluzioni e la capacità di interpretare le esigenze di contesti differenti permettono di reinterpretare la tradizione della stanza da bagno attraverso un linguaggio nuovo: una perfetta sintesi di stile e progetto. Tra memoria e modernità, tecnologia e artigianalità e tra versatilità compositiva e ricerca formale, la proposta Noorth si sviluppa in 10 collezioni nelle quali l’essenzialità delle linee viene esaltata dalle texture irripetibili dei marmi e delle essenze, dalla nuova ed esclusiva palette dei laccati, dalla trasparenza assoluta dei cristalli e dalla lucentezza dei metalli. Un attento studio sui materiali, sugli abbinamenti cromatici e sulle materie prime, permettono la realizzazione di progetti completi e definiti, offrendo prodotti sempre unici e esclusivi.

A custom approach to bathroom design for a timeless collection, a journey through versatile solutions based on maximum functionality. A collection characterised by the exclusivity of the materials, by the balance of the volumes, and by in-depth research into colour; an exclusive proposal, with sophisticated details, where the work quality, the wide range of solutions, and the ability to interpret the needs of different contexts make for a reinterpretation of the bathroom tradition through a new language: a perfect synthesis of style and design. A perfect blend of memory and modernity, technology and craftsmanship, and with versatile compositions and formal research, the Noorth proposal is structured in 10 collections where simple lines are enhanced by the unique textures of the marble and veneers, the new and exclusive palette of lacquers, the absolute transparency of crystals and the shine of metals. A careful study of materials, colour combinations, and raw materials for the creation of complete and distinctive projects, offering unique and exclusive products.

Mission / Design / Materials

Mission. Abbiamo scelto il nome Noorth perché evocativo di un'idea di freschezza e di semplicità che, variamente modulata, si ritrova unanimemente percepita e condivisa in culture differenti. In questa ottica, le radici italiane e il forte legame con la tradizione che contraddistinguono la nostra realtà sono considerati qualità fondamentali da valorizzare con sensibilità e linguaggi espressivi diversi. Una visione che vogliamo tradurre in una collezione per l'arredo dell'ambiente bagno senza tempo e quindi davvero contemporanea, un insieme ragionato di precisi strumenti di progettazione affiancati da soluzioni stilistiche dal forte valore evocativo. Una proposta concreta, definita e in continua evoluzione, basata su scelte tecniche rigorose del centro ricerche Noorth stimolate da un dialogo continuo con la creatività del migliore design.

Progetto. Dalla definizione dell'architettura alla caratterizzazione espressiva: il centro ricerche Noorth lavora con il preciso obiettivo di raggiungere proposte concrete, pensate per ambienti bagno reali, in grado di rispondere alle diverse esigenze progettuali con soluzioni sempre funzionali e stilisticamente coerenti. Dai sistemi di contenitori componibili come Puro e Sintesi a quelli più definiti come Zenit e Caba, fino a soluzioni fortemente iconiche come Touch e Saba; da progetti dal forte valore evocativo come Azuco, Azuma e Roma a proposte dal valore più tecnico come Fjord: la collezione Noorth è un grande sistema integrato che prevede una straordinaria offerta di accessori e complementi, risultato di un'attenta cura degli aspetti tecnici e formali.

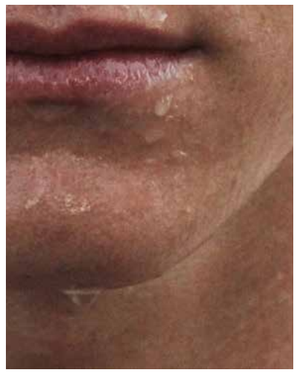

Materiali. Il bagno è un ambiente particolare, in cui le esigenze tecniche legate alla presenza dell'acqua, del vapore e di sostanze per la cura del corpo sono affiancate da un diffuso desiderio di naturalità. Questa consapevolezza ci porta a dedicare un'attenzione particolare a ricerca e scelta dei materiali: da quelli naturali come pietre, legni, quarzite e vetri a quelli dal valore più tecnico come le resine e l'alluminio. Selezionati con cura in base alle specifiche proprietà, i materiali Noorth dialogano con armonia nel rispetto di un preciso obiettivo: fornire soluzioni stilisticamente diverse e allo stesso tempo coordinate in virtù di una visione comune, basata su una qualità estetica e d'immagine senza tempo.
La proposta viene affiancata dalle laccature, opache o lucide, ottenute con l'utilizzo di vernici all'acqua di ultima generazione, nel rispetto dei più rigorosi principi di sostenibilità.

Mission. We chose the name Noorth because it evokes a freshness and simplicity that, in their various forms, are understood and shared by different cultures. Our interpretation sees the Italian roots and the strong connection with tradition that are our trademark as fundamental qualities, worthy of being highlighted with sensitivity and various means of expression. It is a vision that we want to translate in a timeless and thus truly contemporary collection of bathroom fixtures, a whole created with precise design tools combined with strongly evocative stylistic solutions. A concrete, well-defined proposal in constant evolution, based on the rigorous technical choices of the Noorth research centre, stimulated by a constant dialogue with the creativity of the best designers.

Design. From the definition of architecture to expressive characterisation: the Noorth research centre works with the precise goal of reaching concrete proposals, for real bathrooms, able to offer always functional and stylistically coherent solutions to various design needs. From modular container systems, like Puro and Sintesi, Zenit and Caba, all the way to iconic solutions, like Touch and Saba; from highly evocative designs, like Azuco, Azuma and Roma, to more technical suggestions, like Fjord: the Noorth collection is a large integrated system that offers an extraordinary range of accessories, the result of meticulous attention to every technical and formal aspect.

Materials. A bathroom is a particular environment, in which technical requirements related to the presence of water, steam, and body care products must be combined with a universal desire for simplicity. This awareness has led us to perform specific research in the choice of materials: we opted for both natural types, like stone, wood and glass, and for more technical forms, such as resins and aluminium. Selected with care based on their specific properties, the materials used by Noorth are combined harmoniously towards a precise goal: to provide stylistically diverse solutions that are driven by a common vision, based on aesthetic quality and a timeless image. The range is combined with matte or transparent veneers, obtained with the use of the most technologically advanced varnishes.

A JOURNEY THAT GOES BEYOND AESTHETICS AND BEYOND FUNCTIONALITY TO DELVE DEEPER INTO THE THEME OF COMFORT IN A REFINED AND EXCLUSIVE ENVIRONMENT, WHERE THE DIALOGUE BETWEEN VOLUMES, SURFACES AND LINES TRANSLATES INTO SOPHISTICATED AND TIMELESS ELEGANCE.

Un sistema componibile ad alte prestazioni, basato su una struttura in alluminio e un insieme di attrezzature e accessori esclusivi: contenitori a cassetti in essenza o laccati, ripiani diversi per vani a giorno, piani lavabo, specchiere e mensole attrezzate. Prevista nella versione freestanding o sospesa a parete, la collezione consente un’ampia varietà di soluzioni compositive.

A high-performance modular system based on an aluminium structure and a set of exclusive equipment and accessories: drawer units in wood or lacquer, different shelves for open compartments, washbasin tops, mirrors, and equipped shelves. Available in freestanding or wall-hung versions, the collection makes for a wide variety of compositional solutions.

design Altherr Désile Park

Un’estetica che si basa sulla sofisticata combinazione tra i volumi monomaterici dei piani lavabo e dei contenitori, ottenuta da una perfetta unione a 45° degli elementi, e le delicate texture geometriche delle superfici, ispirate ai pattern tessili e naturali. La collezione prevede i piani in versione monomaterica con lavabo integrato, in pietra o con sottolavabo in Milltek gel.

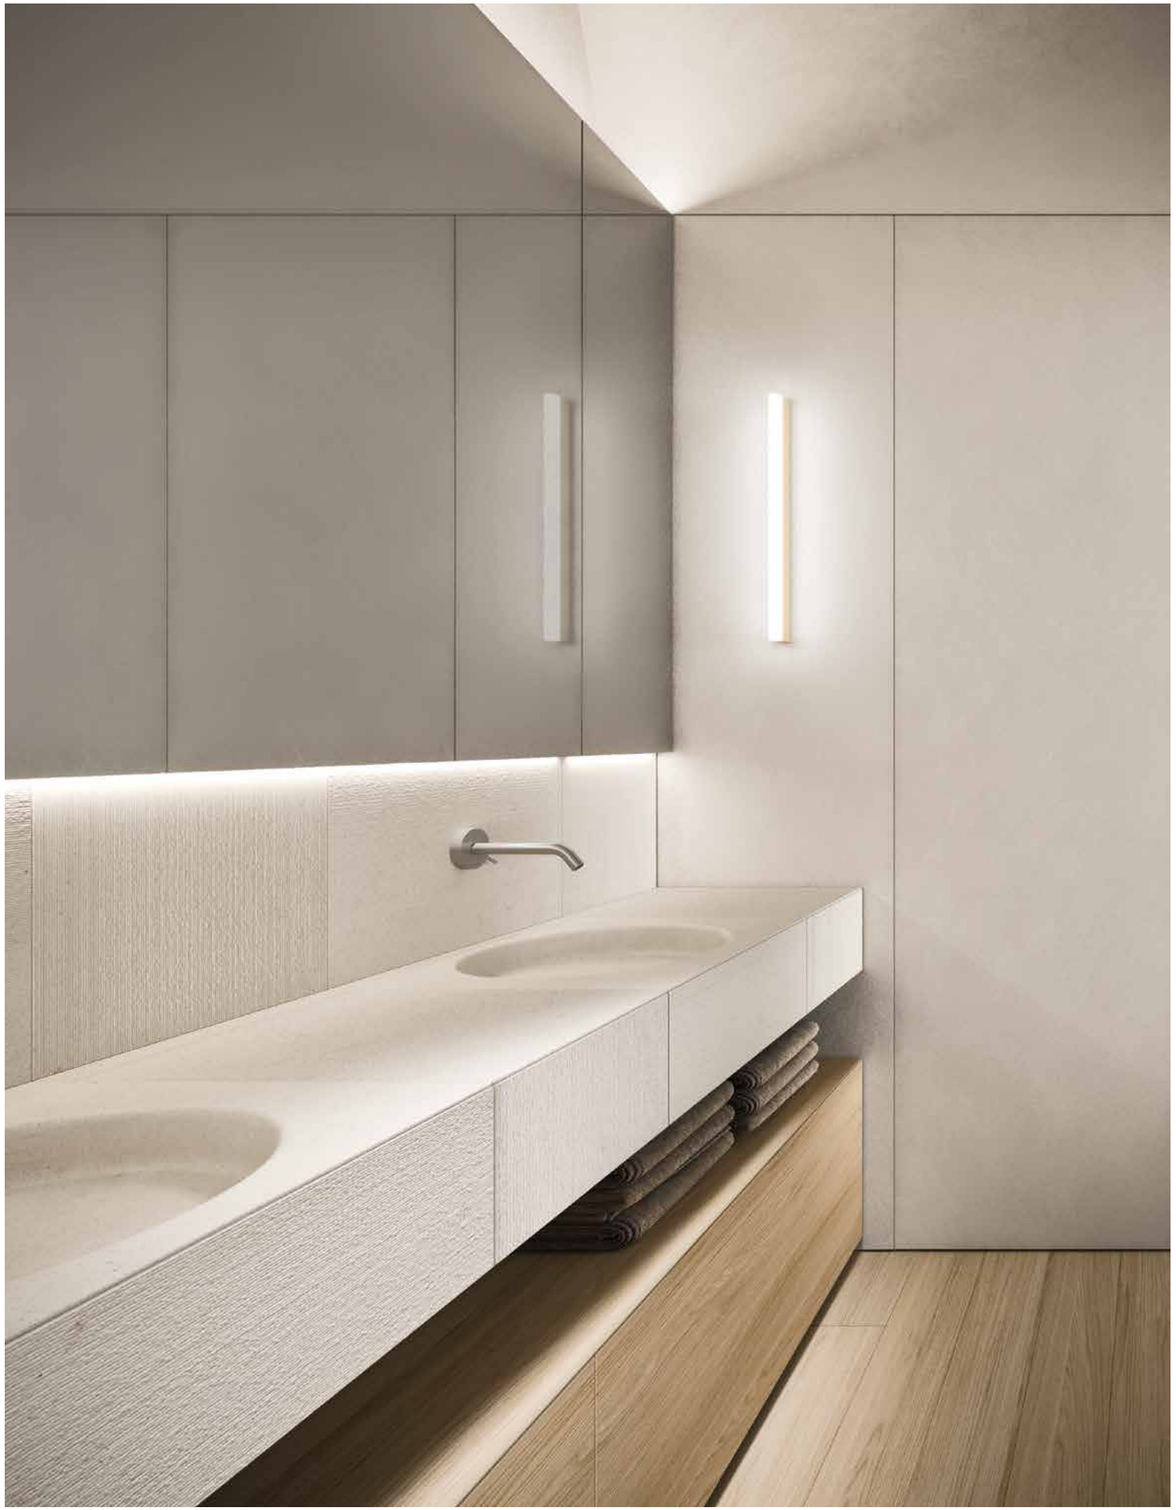

An aesthetic based on the sophisticated combination of the washbasin tops and containers’ single-material volumes, obtained through a perfect 45° union of the elements, and the delicate geometric textures of the surfaces, inspired by textile and natural patterns. The collection provides a variety of tops, including those made of a single material with a integrated stone washbasin, and those with Milltek gel vanity unit.

design Altherr Désile Park

Filosofia orientale, tecnologia occidentale. Una proposta che reinterpreta l’estetica del bagno giapponese, una dimensione di grande fascino evocativo in cui la principale fonte d’ispirazione è la natura. Così ecco che i lati dei lavabi e della vasca si modificano, come una goccia d’acqua che cade, da circolari nella parte superiore a squadrati alla base. E mentre i piani d’appoggio della vasca ricordano i ciottoli levigati dall’acqua, gli sgabelli sono volumi essenziali come le rocce in un giardino zen. Forme organiche, semplici solo in apparenza e sempre attuali perché ispirate a un linguaggio senza tempo.

Oriental philosophy, Western technology. A solution that reinterprets the aesthetics of the Japanese bathtub, a size with a highly evocative charm whose main source of inspiration is nature. The sides of the washbasins and the bathtub, like a drop of water falling, evolve from the circularity of the top to the square bases. While the supporting surfaces of the bathtub recall pebbles polished by water, the stools are essential volumes like the rocks of a zen garden. Organic shapes that only appear to be simple and are always modern, as they draw inspiration from a timeless language.

Drops

Puro

design Michele Marcon

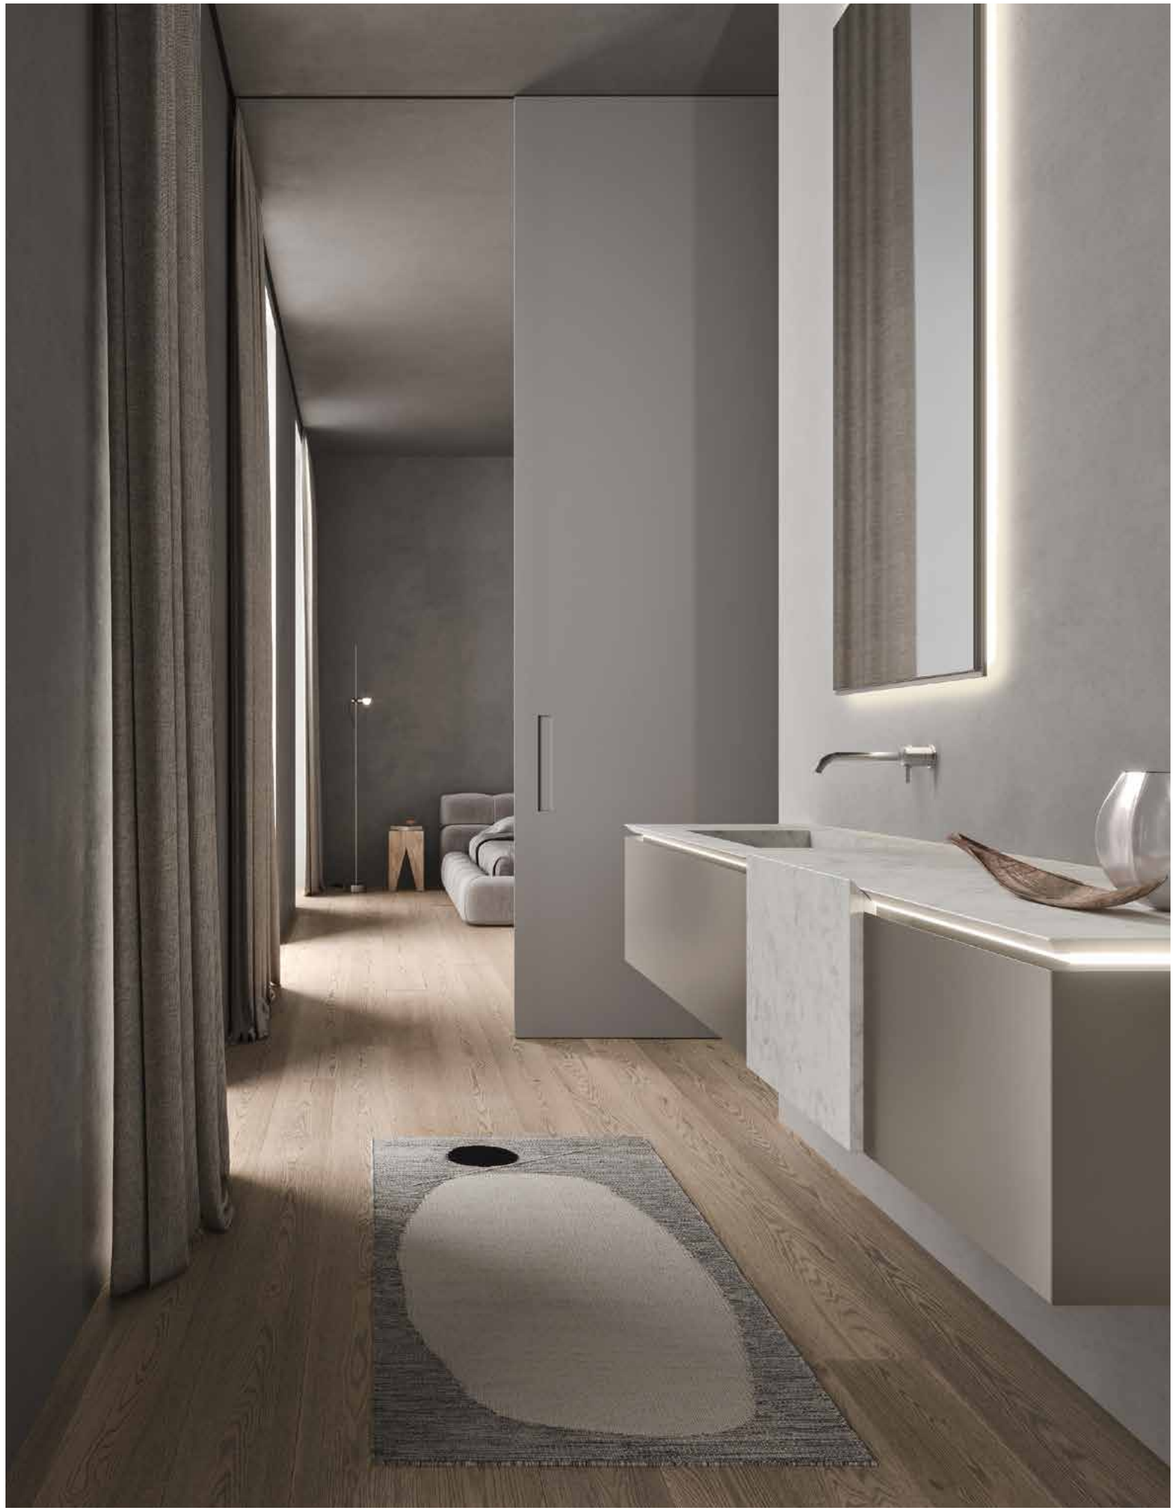

Un design rigoroso fatto di superfici preziose e geometrie perfette, sottolineate
dalla lavorazione a 45° di piani e contenitori e dall'assenza della maniglia, sostituita dalla gola.
La collezione è arricchita da un inedito fianco laterale in vetro per le basi e dalle colonne
a giorno con luce integrata.

A rigorous design made of precious surfaces and perfect structures, underlined
by the 45° working of the tops and the units and by the absence of the handle, replaced by the
groove. The collection is enriched by an unprecedented glass side panel for the bases
and by the open elements with integrated light.

Sintesi – Sintesi Reki

design Michele Marcon

Un sistema reso straordinariamente flessibile dalla varietà dimensionale degli elementi
e delle soluzioni previste per l’apertura dei contenitori, disponibili con gola o push&pull.
La collezione si arricchisce del fianco laterale, oggi disponibile in tutti i materiali
e finiture del sistema, e dell’anta Reki, prevista in Noce Canaletto o in laccato opaco.

A system made extraordinarily flexible by the dimensional variety of the elements and
solutions provided for the containers, available with groove or push-pull opening system.
The collection is enhanced by the side panel, now available in all the materials and finishes
of the collection, and the Reki door, available in Noce Canaletto or matte lacquer.

Zenit – Zenit Reki

design Michele Marcon

Geometrie definite ed essenziali: Zenit è un sistema di contenitori sottolavabo, monoblocco o componibili, disponibili sia nella versione a terra che nella versione sospesa, per una massima versatilità funzionale. Superfici in finitura laccato e in essenza ne permettono la più ampia personalizzazione formale. Il taglio a 45° gradi come tratto continuo tra frontali e fianchi, la gola centrale come elemento funzionale ma anche di definizione estetica dell'immagine.

Well-defined and essential geometries: Zenit is a container system designed for under the washbasin. It comes in a single-block or modular layout, both available as floor-mounted and wall-mounted versions for maximum functional versatility. Lacquered surfaces and veneer finish ensure the widest possible customising options. The 45° cutting angle serves as continuity between the front and sides, using the central groove as a functional element, but with a markedly aesthetic connotation.

Caba

design Altherr Désile Park

Semplice, versatile, funzionale: il sistema di contenitori Caba risolve le tipiche esigenze di contenimento dell'ambiente bagno. L'ingombro minimo degli elementi e la varietà delle finiture offrono un richiamo alla classicità della boiserie, mentre le versioni integrate alla zona lavabo e sanitari lo rendono adatto ad ogni progetto.

Smooth, versatile, functional: the Caba container system solves the typical storage needs of the bathroom. The minimal size of the elements and the variety of finishes echo the classicism of the wall panelling, the functionality of the equipped compartment between the base and wall units, while the integrated versions with the washbasin and sanitary fixtures make it suitable for any project.

Saba

Roma

Touch

Azuma

Tube

Washbasins

Il lavabo, elemento centrale nel progetto dell’ambiente bagno, trova nella versione freestanding la sua espressione più pura. La collezione Noorth prevede per questa particolare tipologia soluzioni diverse, sui piani formale, stilistico e funzionale. Dall’essenzialità di Tube e Azuma all’originalità di Saba, fino all esclusività di Touch e Roma: una proposta completa, che coniuga qualità estetica e flessibilità progettuale.

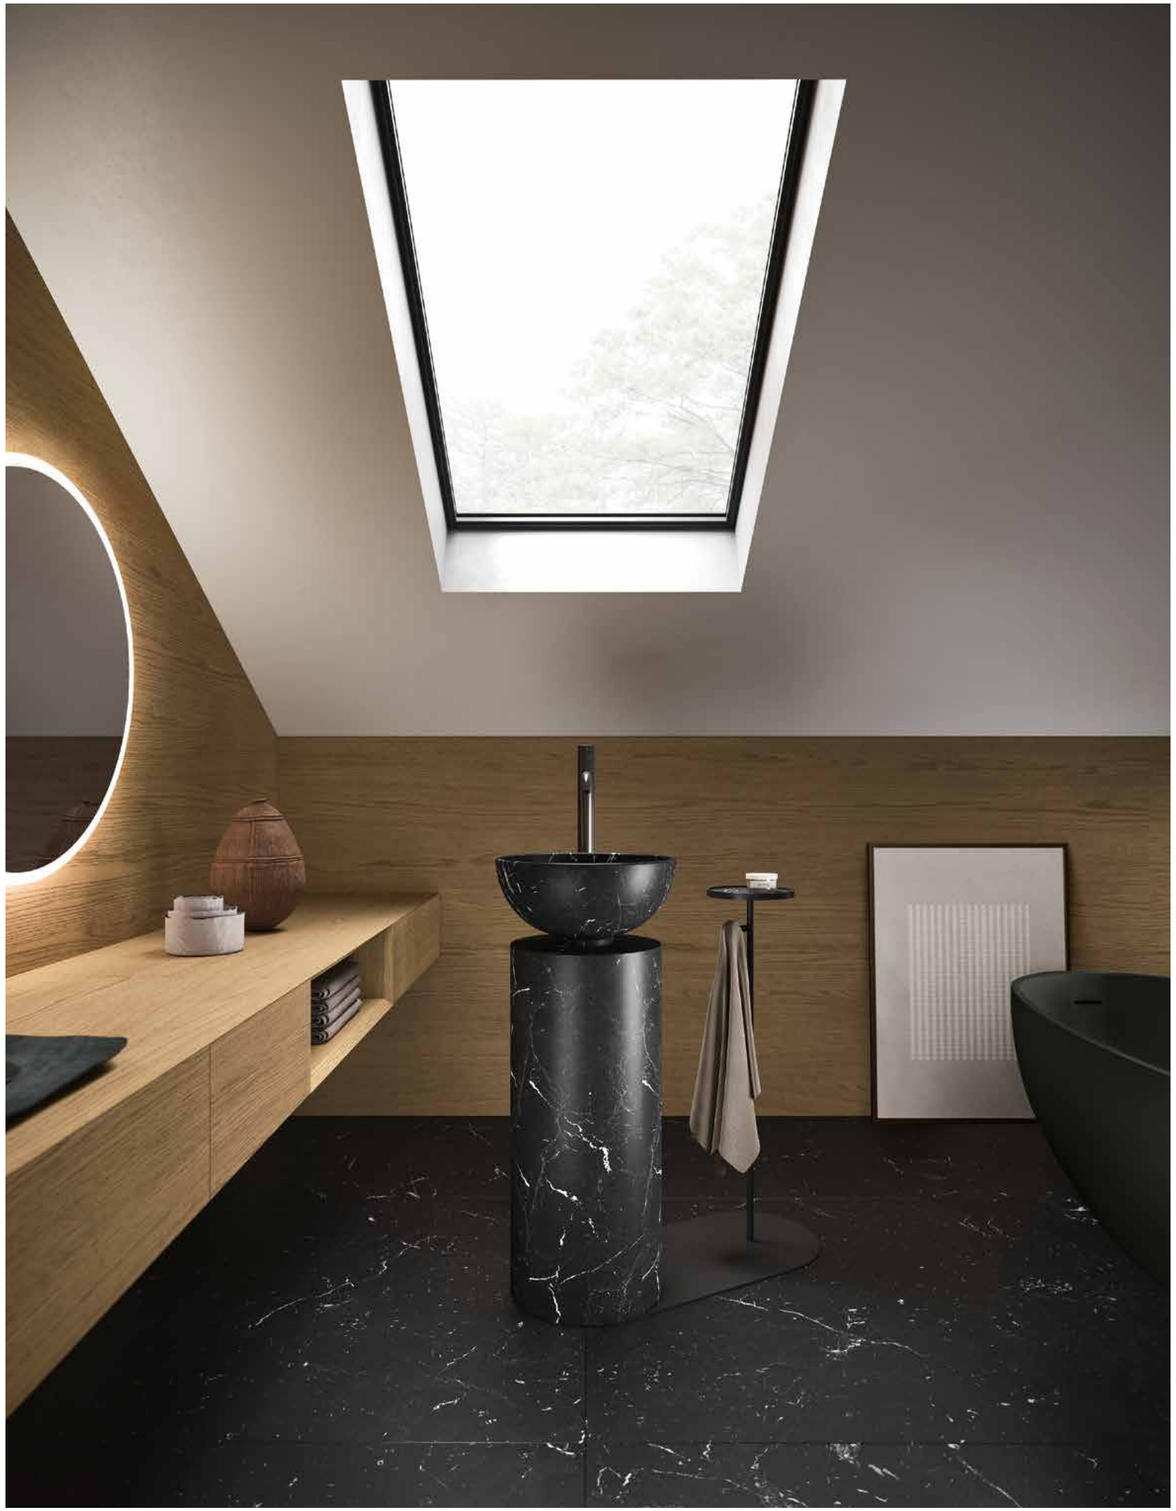

The washbasin, a key element of the bathroom design, finds its purest expression in the freestanding version. The Noorth collection provides different solutions for this category, working on shapes, style and function. From the essentiality of Tube and Azuma to the originality of Saba, up to the exclusivity of Touch and Roma: a complete proposal, which combines aesthetic quality and design flexibility.

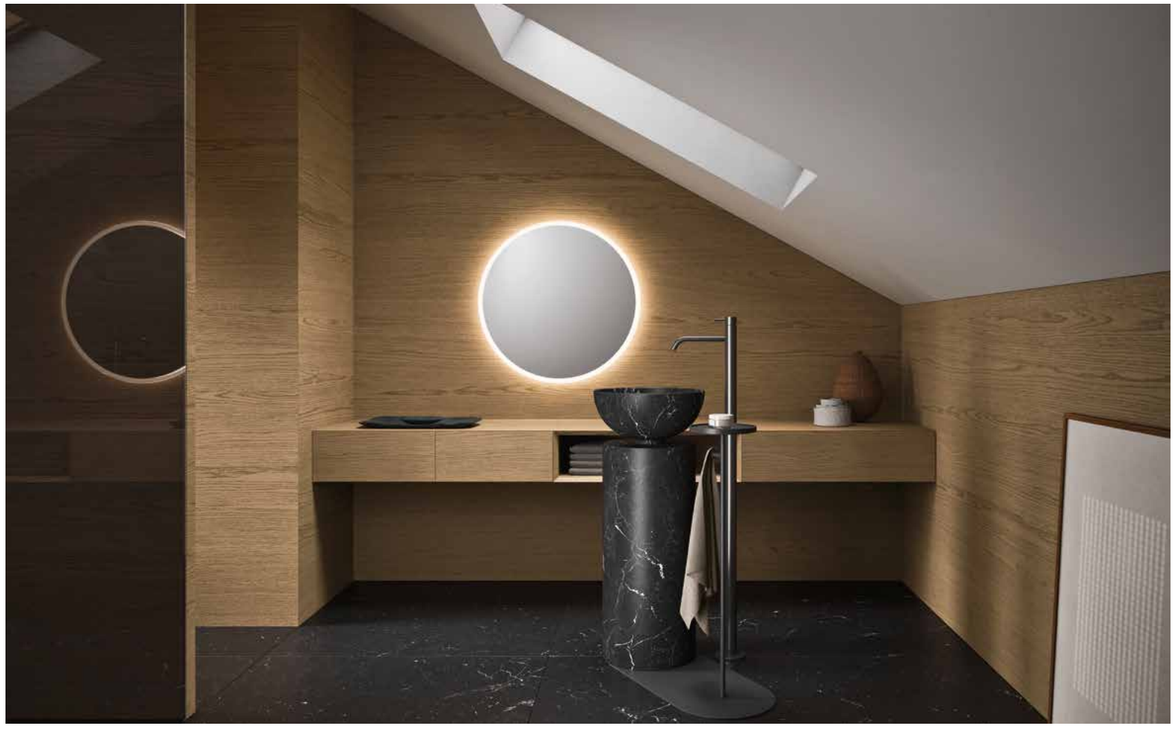

Saba

design Altherr Désile Park

Saba è un lavabo a colonna dal sapore intramontabile, un oggetto forte nella sua estrema semplicità. La sua forma archetipica e minimalista consente l'uso di finiture e materiali diversi, suggerendo un libero inserimento in contesti indoor e outdoor. Un elemento di carattere ma al contempo discreto di un'architettura, in grado di inserirsi armonicamente sia in spazi classici che contemporanei, sia domestici che pubblici. I lavabi Saba sono previsti in marmo, cemento, argilla e laccato, in versione monomaterica o con base nelle diverse essenze lignee della collezione.

Saba is a column washbasin with a timeless feel, that makes quite the statement in its radical simplicity. Its minimalist traditional shape allows the use of different finishes and materials, fitting in both indoor and outdoor settings. A piece capable of being the stand-out featured of an architecture but at the same time discreet, able to fit harmoniously into both classic and contemporary domestic and public spaces. Saba washbasins are available in marble, concrete, clay and lacquered, in a single material version or with a base in the different wooden essences of the collection.

Roma

design Altherr Désile Park

La ricerca della simmetria, l’equilibrio geometrico, la combinazione tra i materiali e la loro lavorazione sono gli aspetti distintivi di una collezione riconducibile all’estetica dell’architettura classica mediterranea. Il lavabo e la vasca, monoliti in pietre di diversa natura, colore e lavorazione diventano così assoluti protagonisti dell’ambiente bagno, completato da paraventi dotati di specchiere, fonti luminose e portasciugamani. I lavabi Roma sono disponibili anche con la presenza di parti in essenza lignea alternati a ceramica, marmo e metallo.

The pursuit of symmetry, the perfect shapes, the combined between the materials and their processing are the distinctive aspects of a collection that recalls the aesthetics of classic Mediterranean architecture. The washbasin and bathtub are monoliths made of stones varying in nature, colour and finish and are therefore the key elements of the bathroom, which is complemented with screens, fitted with mirrors and lights, and towel racks. The Roma washbasins are also available with wooden parts alternated with ceramic, marble and metal.

Touch

design Michele Marcon

Un lavabo monolitico dall’estetica minimale, in grado di conferire identità e personalità anche a spazi di piccole dimensioni. Touch è disponibile in un’ampia varietà di finiture: dai marmi alle laccature, fino ai legni e le argille. Una proposta dall’impronta contemporanea, sottolineata dalla combinazione con le specchiere dotate di illuminazione led integrata.

A monolithic washbasin with a minimalist aesthetic, able to give identity and personality even to small spaces. Touch is available in a wide variety of finishes: from marbles to lacquers, to woods and clays. A proposal with a contemporary slant, underlined by the combination with the mirrors equipped with integrated LED lighting.

Azuma

design Altherr Désile Park

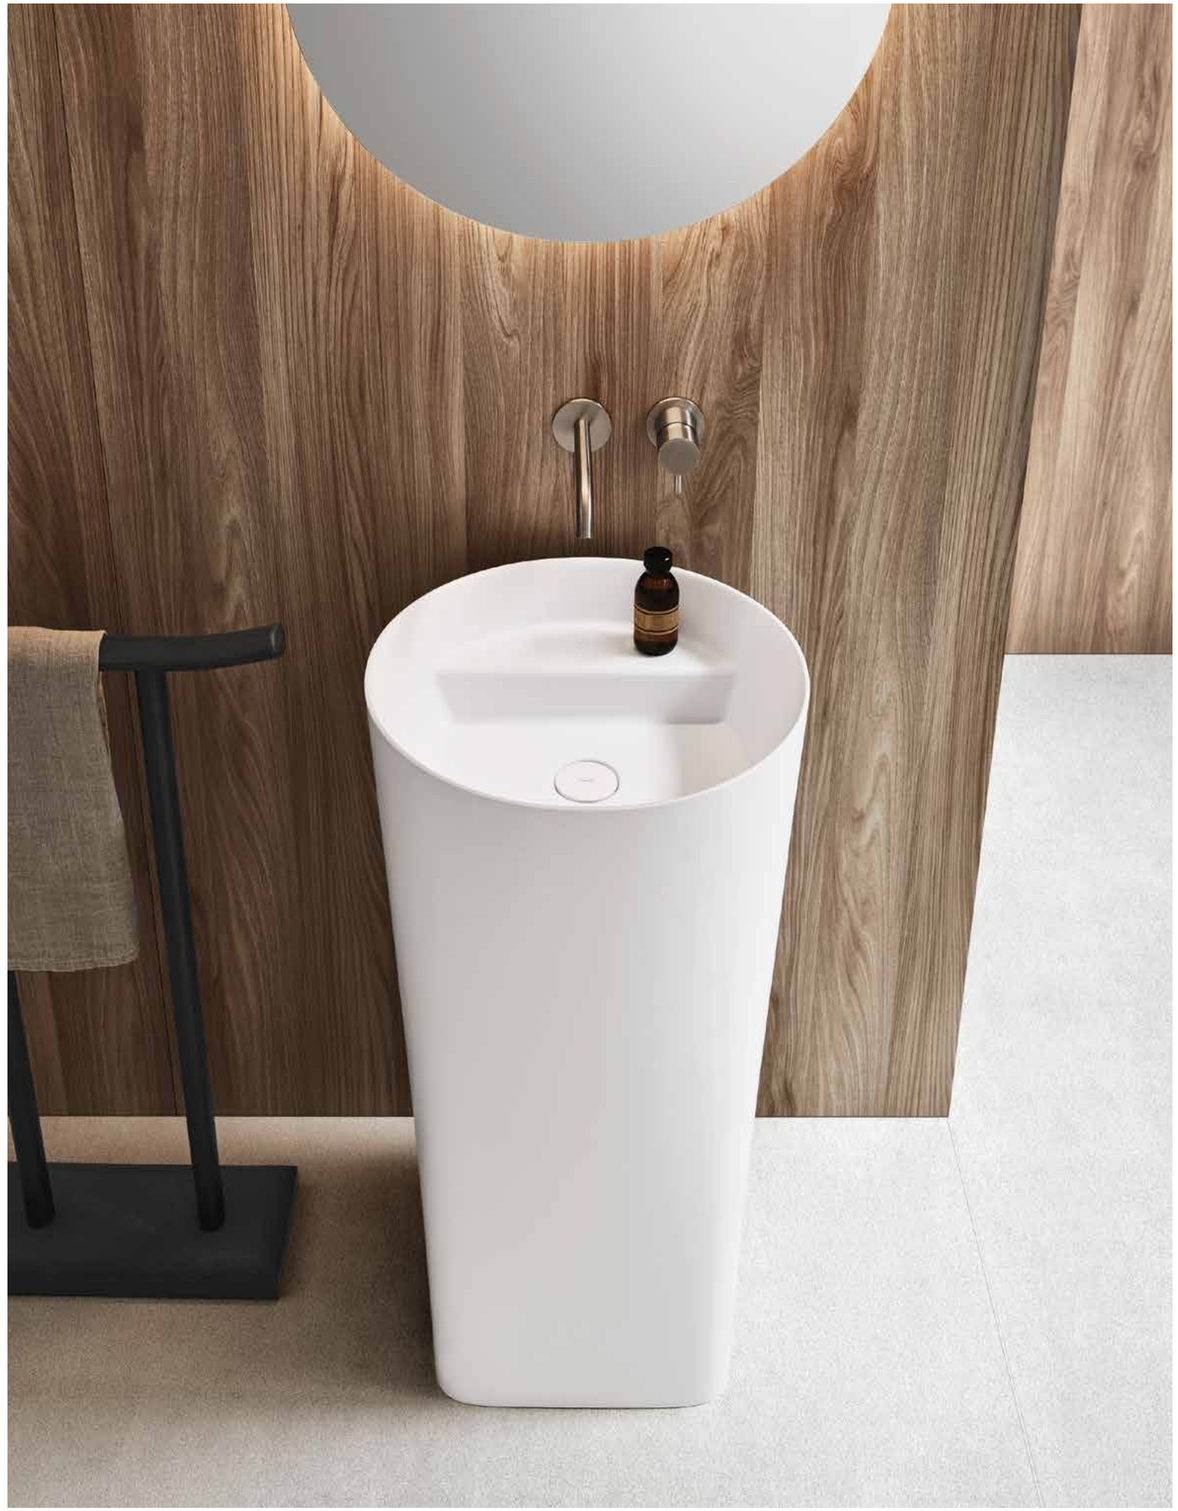

Semplice solo in apparenza, il disegno del lavabo Azuma freestanding riprende la caratteristica forma dei lavabi d'appoggio e della vasca della collezione, con la parte superiore tonda che si raccorda lungo i lati alla base rettilinea. Azuma è disponibile con o senza rubinetteria integrata.

Simple only in appearance, the design of the Azuma freestanding washbasin picks up on the characteristic shape of the collection's countertop washbasins and bathtub, with the round top part connecting along the sides to the rectilinear base. Azuma is available with or without integrated taps.

Tube

design CR Noorth

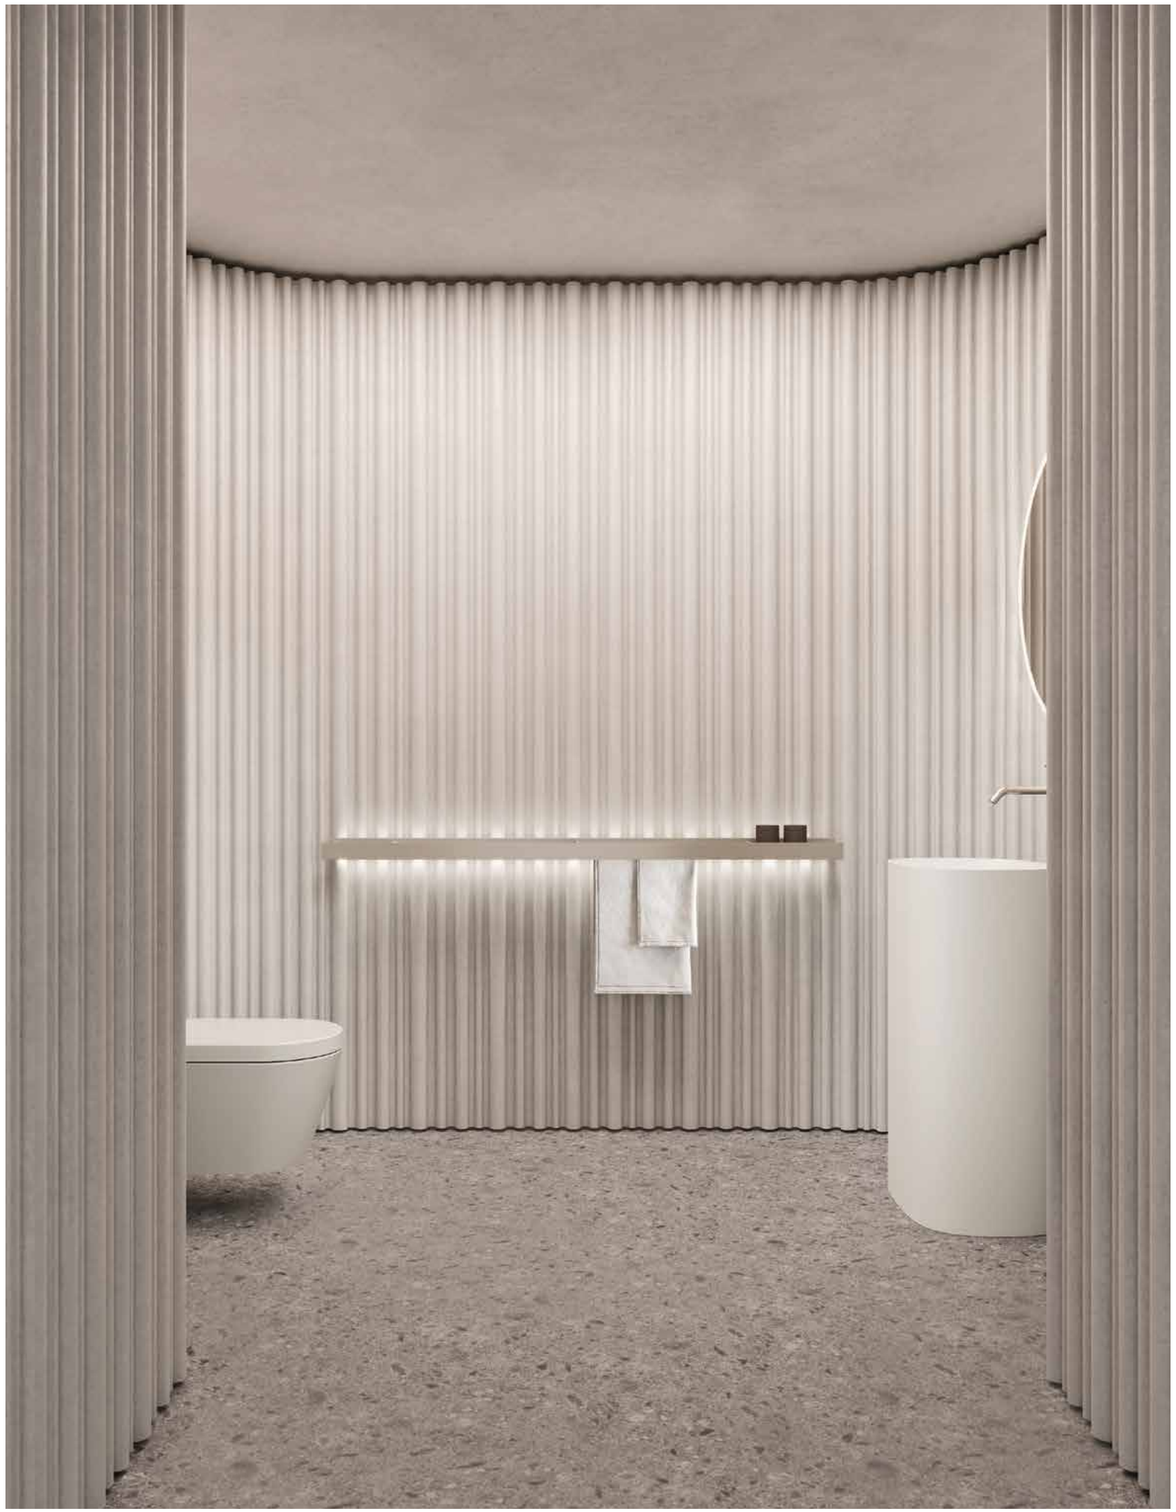

Un lavabo freestanding che fa della semplicità estetica e della versatilità i suoi punti distintivi. Di forma tonda o rettangolare, Tube è previsto in milltek, interamente bianco o con la parte esterna laccata nei diversi colori della collezione.

A freestanding washbasin that stands out for its aesthetic simplicity and versatility. Round or rectangular in shape, Tube is available in milltek, entirely white or with the outside lacquered in the different colours of the collection.
